

### Chapter 11: Saving Page Customizations & Page Defaults

Some pages may provide many options for Page Selectors.

In this example, values have been chosen in eight selectors.

The next request to be generated on this page may require very different page selections.

The **Reset** button should always be used to clear Page Selections between requests. It clears all user-defined selections and recalls the default selections for the page.

The screenshot shows the Oracle BI Interactive Dashboards interface. The browser title is "Oracle BI Interactive Dashboards - General Ledger - Basic Activity - Mozilla Firefox". The address bar shows the URL "https://obiee11test.adminapps.cornell.edu/analytics/saw.dll". The page header includes the Cornell University logo and a search bar. The main navigation bar shows "General Ledger - Basic Activity" and "Transaction" is selected. Below the navigation, there is a message: "2 transaction detail is provided in Financials Dashboards. Detailed transactions supporting all FY11 activity are available in legacy reporting tools." The main content area contains a search form with the following fields:

- Acct And Name: G234715 - UNIV

An "Apply" button is located at the bottom right of the form area. A red callout box points to the "Apply" button with the text: "Once the selections have been made click Apply."

Once the selections have been made, click **Apply**.

Dashboards allow users to save selections as shortcuts for use in the future.

Saving a selection captures the current Page Selections as well as the views in each request on the page.

To save a selection set, click the **Page Options** icon.

The **Edit** box for saved selections opens and displays all available saved selections.

If a selection has been defined as the default for the page, it will be identified in the 'My Default' section.

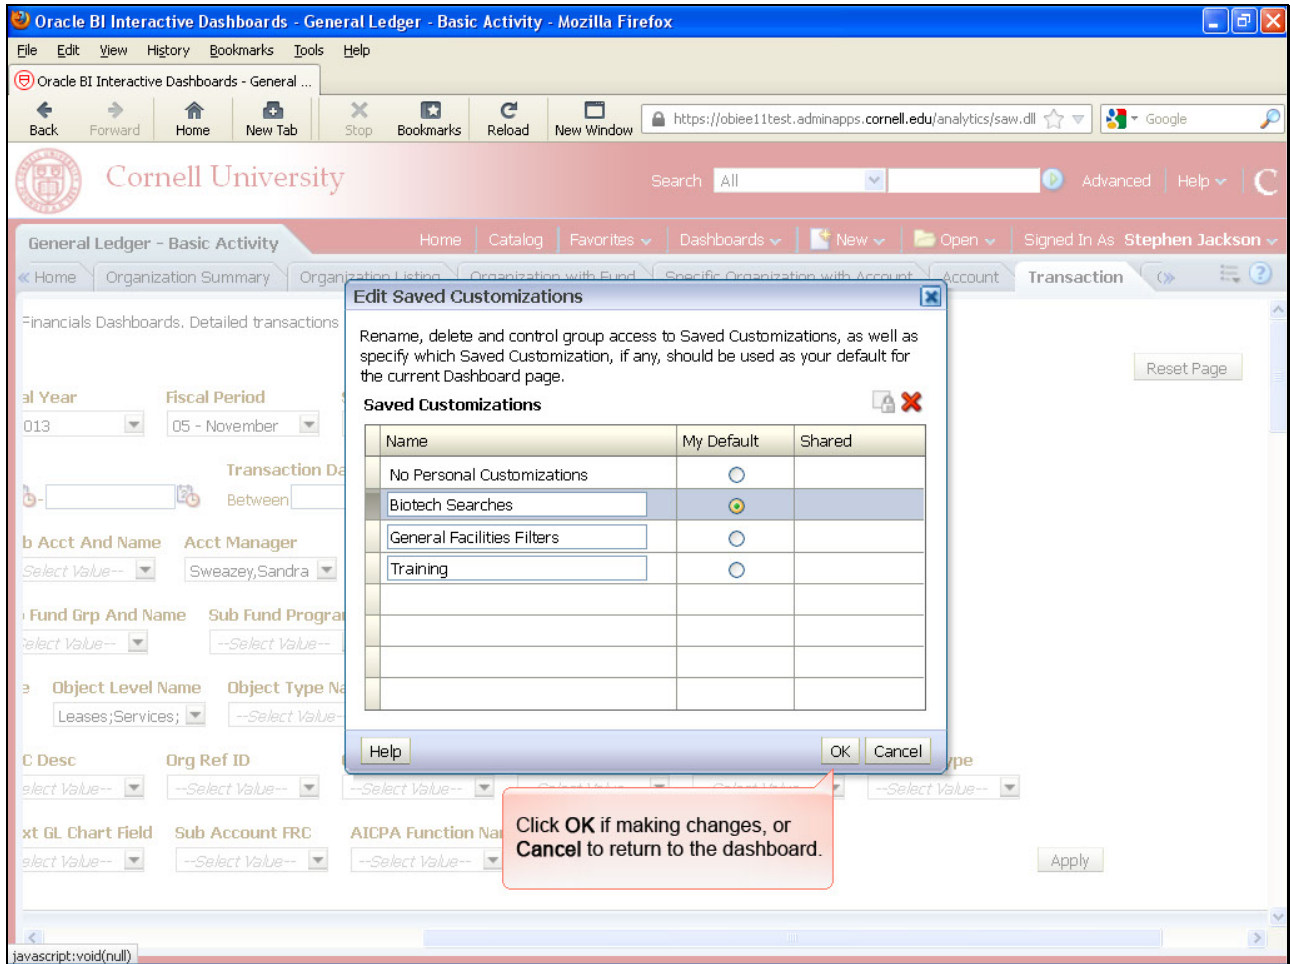

If choosing 'No Personal Customizations' as a default, the dashboard will load data for the default page selections when the page opens.

Doing so requires most users to reset prompt values to select information for their unit. Using a unit-specific selection as a default is recommended.

Clicking the X check box will delete a saved selection (radio button must be clicked on).

Click **OK** if making changes, or **Cancel** to return to the dashboard.
